

Tarmac Northern Quarries

Quarry Drilling and Blasting Services

Client :
Tarmac Northern

Location :
Northern England

Date :
1999 - Present

BAM Ritchies drills and blasts approximately 20 million tonnes of rock annually for a wide variety of clients in the aggregates industry, especially in Scotland and the North of England. One of BAM Ritchies' major clients is Tarmac Northern, which is now part of the international mining house, Anglo-American.

Each year BAM Ritchies drills over 150,000 metres of blast holes producing over 8.5 million tonnes of blasted rock for Tarmac Northern.

BAM Ritchies uses laser face profiling, computer blast design techniques and the latest technology in drilling equipment, managed and operated by trained personnel to ensure that Tarmac Northern's exacting requirements are met.

Teamwork is all important. BAM Ritchies' engineers, shotfirers and drillers work closely with Tarmac quarry managers and staff on a day to day basis to produce the correct tonnages of broken rock on time and of the right quality.
