

## Policy statement

### Royal BAM Group Safety Policy

It is the view of the Executive Board that Royal BAM Group develops, designs, builds and manages projects that supply a want with respect to humans and the environment. With humans we mean everyone who is involved in or affected by the activities of the Group: employees, clients, designers, co-makers, suppliers, subcontractors, buyers and members of the public. 'Environment' concerns our share in responsible care of nature and the human life environment.

This actually means that the policy of Royal BAM Group and the companies that belong to the Group is aimed at such execution of all work activities that in addition to legislative requirements being satisfied:

- Every form of injury and ill health as a result of these work activities is prevented;
- The requirements, wishes and expectations of the client are satisfied;
- Every effort is made to prevent any negative impact that work activities may have upon personal properties and the environment;
- Production processes have a controlled course and are continuously improved.

Every employee of Royal BAM Group and its operating companies has a direct responsibility in achieving these goals. It requires good co-operation and continuous commitment. The management has an exemplary function in this process. We trust everyone to support and propagate this policy.
